Profile Summary:

Passionate computer science student specializing in (AI&ML) with skills in Python, Data Analysis and Model Development. Experienced in building predictive model and data-driven solutions. Strong foundation in algorithms and statistics. Eager to apply knowledge learn and grow through real-world projects. Currently I'm pursuing my master of science-MS in Data Science from Chandigarh University.

Educational Qualification:

Chandigarh University, Panjab CGPA : 7.5 Masters in Data Science.	July 2025 - June 2027
JNTUH - Vaagdevi Engineering College, Warangal CGPA : 6.5 Bachelors in Computer Science Engineering (AI&ML).	June 2020 - Aug 2024
SR Junior College, Warangal 80% Intermediate in the branch of MPC.	June 2018 - March 2020
Assisi E/M School, Warangal CGPA: 9.0 Board of secondary education.	April 2018

Skill Sets:

Programming languages : Python (libraries like Numpy , Pandas) , SQL.

Web Technologies : HTML5, CSS3, JavaScript ES6, Basics of React Js.

Software and Tools : Git/GitHub, Visual Studio Code, Anaconda Navigator, MySQL, MS Tools, Google Colab.

Soft skills : Communication Skills, Problem Solving, Adaptability, Analytical Skills, Time Management.

Projects:

Predicting The Unpredictable: A Look Into The World Of Powerlifting | ML, Python, Google Colab.

Description: To predict peak performance of powerlifters using regression models for better athlete evaluation and training insights.

Tools Used: Python, Linear Regression, Decision Tree, Random Forest, XGBoost, Flask (for local deployment), .pkl model storage, Data Analysis Libraries, Visualization (Matplotlib/Seaborn).

A Greener Tomorrow: Machine Learning In Soil Moisture Prediction | ML, Python, Google Colab.

Description: To accurately predict soil moisture levels for improved agricultural planning, irrigation management, and drought prevention.

Tools Used: Python, Linear Regression, Decision Tree, Random Forest, XGBoost, Flask (for local deployment), .pkl model storage, Data Analysis Libraries, Visualization (Matplotlib/Seaborn).

Health Symptoms Prediction | ML, Python, ReactJs, VScode.

Description: Predict diseases and assess risk levels based on reported symptoms. The disease prediction model achieves 98.39% accuracy, while the risk assessment model achieves 95.09% accuracy.

Tools Used: Python, Random Forest Classifier with optimized hyperparameters, Flask API backend with React frontend, .pkl storage, Data Analysis Libraries, Visualization (Matplotlib/Seaborn).

Uber Rides Booking Analysis | Python, Data Analysis, Data Visualization, VScode.

Description: This comprehensive analysis of the Uber rides booking dataset provides detailed insights into customer behavior, operational performance, and business trends. The dataset contains 150,000 booking records spanning from 2024-01-01 to 2024-12-30.

Tools Used: Python, Data Analysis Libraries, Visualization (Matplotlib/Seaborn).

Certifications:

Certificate 1 : IBM Data Analyst - Coursera.

Certificate 2 : HackerRank - SQL certificate.

Certificate 3 : Completed 6 months course on Python for Data Science in AchieversIT Institute.

Declaration:

I hereby declare that the information provided in this resume is true and accurate to the best of my knowledge.
